

**AHCC 500mg**

#103032

60 VCaps

Category 11  
Specialty Formulas

**Description: AHCC:** this product is extracted from specialized and hybridized mushrooms. Through extensive research, both clinical and non-clinical, AHCC has proven to support the immune system by interaction with macrophages and NK (Natural Killer) cells. NK cells play a major role in the rejection of tumors and cells infected by viruses. The NK cells kill by releasing small proteins that cause the target cell to die by apoptosis or necrosis. It has also proven to be an excellent liver support supplement as well as an antioxidant. **PROPERTIES:** immune support, antioxidant

#### Contents / Ingredients

#### Traditional Therapeutic Action

AHCC (Active Hexose Correlated Compound) should not be confused or used as a drug. This product was originally designed as a nutritional supplement through specialized hybridized mushrooms, with intents to lower high-blood pressure. However, researchers at Tokyo University found AHCC to be extremely beneficial in supporting the immune system. Their research concluded that AHCC significantly increased NK (natural killer) cells activity in cancer patients, and also enhanced the effects of killer T-cells.

It is a rich source of polysaccharides such as beta glucan 1,3 and activated hemicellulose produced by enzymatic modification of organic medicinal mushrooms, including shiitake. It also has been shown to support normal levels of macrophages and cytokines, further strengthening the immune system.

**COMPLEMENTARY SUPPLEMENTATION:** Antioxidants, Aerobic Oxygen, Immune Booster, Colostrum Plus, Reishi Blend, Hoxsiac.

**SUGGESTED DOSAGE:** As a dietary supplement, take 2 Vcaps 3 times a day, preferably on an empty stomach.

**CAUTIONS:** Pregnant or lactating women, or anyone using prescription drugs should consult with a practitioner before use.
