(Topical Application) #107625

1 oz

**Description:** Tea Tree Oil has an excellent antimicrobial effect, and contains 48 identified organic compounds. These account for the antibiotic, anesthetic, and wound healing properties of Tea Tree Oil.

#### Contents / Ingredients

#### Traditional Therapeutic Action

**Tea Tree Oil** is a general name for members of the *Melaleuca alternifolia* family. Its name is derived from local usage as a type of herbal tea, prepared from the leaves. Our present knowledge of the properties and uses of tea tree is based on a very long history of use by the aboriginal people of Australia. Recently it has been extensively researched by scientific methods with the following results.

1. The oil is unusual in that it is active against all three varieties of infectious organisms: **bacteria, fungi and viruses.**
2. It is a very **powerful immuno-stimulant.** When applied it will penetrate through the skin. If the body is threatened by any of the above organisms **Tea Tree Oil** will increase the bodies ability to respond.

#### Tea Tree Oil is used to treat:

- cuts, •scratches, •abrasions, •burns, •sunburn, •prickly heat, •insect bites,
- allergic and itching dermatoses, •scalds, •cosmetic rashes, •anal and genital pruritus, •herpes simplex lesions, •athlete's foot, •impetigo, •furunculosis, •psoriasis, •seborrheic dermatitis, •ringworm,
- decubitus and stasis ulcers, •paronychia, •thrush, •tinea pedis, •bromidrosis, •lice infestation,
- pimples, •pyorrhea, •gingivitis, •halitosis, •bronchial and sinus congestion, •trichomonal vaginitis,
- moniliasis and •endocervicitis.

**Tea Tree Oil** works very effectively with a **wide range of skin conditions** as is evident from all the listings above. The oil is frequently used as a powerful antiseptic that is very useful against fungal skin infections, including athlete's foot and yeast infections. Several women have reported success using **Tea Tree Oil** for vaginal infections that could not be entirely eradicated by pharmaceuticals like nystatin and clotrimazole. **Tea Tree Oil** is also very effective against the most stubborn fungal infection, the kind that thickens and discolors toenails. Apply 100% tea tree oil twice a day to affected area.

**SUGGESTED DOSAGE:** Topical application

**CAUTION:** Non-irritant, non-toxic. But caution should be used on sensitive areas of skin and those of an allergic skin type.
