TOOTHPASTE NATURE'S SECRET (Cinnamon) #804503

Description: Oxygenated Toothpaste: All ingredients in this toothpaste formula have been chosen for their therapeutic effects in the mouth, and for their cleaning ability. We have also removed **Fluoride** and **Sodium Lauryl / Laureth Sulphate**. Designed especially for the health conscious market.

Contents / Ingredients

Traditional Therapeutic Action

Vitaminize, Mineralize, Energize and Oxygenate while you brush your teeth.

Our Aerobic Oxygen toothpaste will increase the cleaning power of the toothpaste as well as oxygenate the gums to help maintain good oral hygiene. We have added **Aerobic Oxygen** in deionized water to help act as a natural preserver and as a **Cellular energizer**. Aerobic Oxygen will destroy all anaerobic bacteria and will complement the other ingredients added like **myrrh** and **neem** that act as a natural preservative and cleaner.

Yucca has been added as a natural foaming agent, **Calcium carbonate** for its gentle abrasive effect, and a little bit of unpasteurized honey to sweeten it up. Spearmint, bubblegum, and fennel, that make up the 3 great flavors.

We have also included **Certified Organic** Australian Tea tree oil. Our Tea tree oil is extracted through steam distillation only. The Terpinen 4 ol content is over 36% and the Cineole is around 5%. Both of these contents will exceed the Australian standard and is considered pharmaceutical grade. Tea tree oil has anti-bacterial, anti-fungal, anti-viral and anti-inflammatory properties.

To top this off we have added natural vitamin and mineral sources in the form of liquid organic kelp. Kelp is known to contain 83 different minerals and vitamins (except vitamin C). After all, the mouth is the most absorbent place in the body!

Due to growing health concerns we have not added any **Fluoride** or **Sodium Lauryl / Laureth Sulphate**. With the mouth being the most absorbent place in the body, this formula will contribute to your good health on a cellular level. Other ingredients include - sorbitol that comes from mountain ash berries, sea salt from France that acts as a ionic barrier on the teeth to help make the teeth less sensitive, and baking soda for some abrasive and effervescent effect.

Points to remember:

- **Oxygenated formula**
- **Certified organic Tea tree oil**
- **Contains 83 vitamins and minerals**
- **Contains NO Fluoride**
- **NO Sodium Lauryl / Laureth sulphate**
- **Contains sea salt in ionic form for sensitive teeth**

SUGGESTED DOSAGE: Use as directed.
