Magnetic Blocks

Magnetic Block

(Petro Block) 1100 Gauss #455154
(Petro Block) Super Duty #455155

Contents / Ingredients

Traditional Therapeutic Action

As a health company we are interested in promoting products or services that will help improve or benefit the environment as well as improve your health.

Petro-Mag Fuel Activator is a product that will have an impact on the environment as it decreases exhaust emissions as well as increases your miles per gallon. We are seeing more and more vehicles on our roads along with an elevation in industrial waste pollution.

Do we realize the devastating effects on our health that exhaust emissions have? Dr. William Koch, physician and oxidation expert states: "The worst kind of toxic free radicals in the human body are formed from the compounds in automobile exhaust".

Each of us can contribute in small ways by reducing the pollutants in the air. Often these small changes can eventually have very positive implications on our environment.

The Petro-Mag is easily installed in about 10 minutes, it can be fitted on a **gasoline** or **diesel engine**. The product is inexpensive, easily installed, and requires no modification. We have many customers reporting gas savings anything from **5% to 20% plus**. With the gas prices increasing it will ease costs to many households. There are only two things that you need to know. One is to mount the Petro-Mag unit as close to the carburetor as possible. And the other, **DO NOT** place the Petro-Mag within 6 inches of computer components because the Petro-Mag's magnetic field could interfere with the instruments. Users have reported the following benefits: *Decrease in exhaust emissions, increase in miles per gallon, better starting, smoother running engine, clearer oil, significantly improved vehicle performance, improved acceleration, fuel injector systems remain cleaner, as well as the spark plugs.*

THEORY OF HOW IT WORKS

As fuel stands, ages, expands or contracts, molecules begin to cluster. Fuel travelling through the fuel line carries these molecules and clusters with it. Large clusters trap molecules, molecules which are concealed within the clusters do not burn completely. Air, required for complete burning, cannot penetrate the clusters. Large clusters tend to slow in speed and gravitate toward the side of the fuel line. They attach themselves, forming unwanted deposits which, in turn may restrict the flow of fuel and inhibit overall engine performance.

Immediately, as the flow of fuel brings clusters of molecules in contact with the powerful magnetic circuitry of the Petro-Mag fuel activator, the clusters of molecules are abruptly broken apart. Fuel, free of clusters of molecules, burns completely in the engine thanks to Petro-Mag's magnetic circuitry and its special cleansing power. Complete fuel burning means the engine runs more smoothly. There is less engine hesitation. Idle speed increases measurably. Exhaust emissions are cleaner and free of dangerous air pollutants. Mileage also increases. Benefits of the Petro-Mag fuel activator last for the life of the engine.

CAUTION: Magnets should not be used with pacemakers. Computer disks, credit cards or recording tapes can also be erased by close contact with magnets.
